Table of Contents

Russia's pharmaceutical market consists largely of an out-of-pocket retail market, and the retail market is driven by the promotion of branded products, including both originator and branded generics. A trend of increases in the cost of health care has drawn public scrutiny. Government budget constraints may impact the timing of market entry and/or adversely affect pricing, and compel the government to resort to a tendering model. This could create new challenges—particularly for foreign companies, as along with downward pricing pressures, Russia tends to favor domestically based producers.

Environmental Matters

We are subject to federal, state, and local environmental laws and regulations in the United States and abroad. We believe that our operations comply in all material respects with applicable environmental laws and regulations in each jurisdiction where we have a business presence. Although we continue to make capital expenditures for environmental protection, we do not anticipate any significant expenditure in order to comply with such laws and regulations that would have a material impact on our earnings or competitive position. We are not aware of any pending litigation or significant financial obligations arising from current or past environmental practices that are likely to have a material adverse effect on our financial position. We cannot assure you, however, that environmental problems relating to facilities owned or operated by us will not develop in the future, and we cannot predict whether any such problems, if they were to develop, could require significant expenditures on our part. In addition, we are unable to predict what legislation or regulations may be adopted or enacted in the future with respect to environmental protection and waste disposal. Refer to "ITEM 1A. RISK FACTORS — Risks Related to Our Business — Our business will continue to expose us to risks of environmental liabilities" in this document.

Seasonality

There are no significant seasonal aspects that are expected to materially impact our business.

Backlog

As a result of the extent of our supply chain, backlog of orders is not material to our business.

Employees

As of December 31, 2014, we had approximately 21,600 employees. Of our employees, approximately 2,070 were engaged in R&D, 7,600 in manufacturing, 2,400 in quality assurance and quality control, 8,580 in sales, marketing and distribution, and 950 in administration.
